

Your Glasses

Can do you a wonderful amount of good if they fit you properly but if they don't they will do the same amount of harm. It is better not to wear glasses at all than to wear glasses that do not fit perfectly. If you are in doubt about them fitting you see our Optometrist about them, he is a specialist along this line and can serve you well.

The United States food administration requires that all bakers—everybody, in fact—using over 10 barrels of flour in a month must take out a license before December 10, the object of this being to reduce the waste of flour and to limit the use of sugar and lard. Of all the bread baked in the United States, 40 per cent of it is baked in bakeries and 60 per cent in homes.

Anyone desiring a good, comfortable, well located office, suitable to a lawyer, dentist or real estate man's needs, better look at this empty suite of rooms in Twinem building, front view.

A Swede, armed with a gun which he was using promiscuously in the railroad yards, was arrested Saturday and placed in jail. The fellow gave evidence of being a little weak mentally and is therefore considered a rather bad man to be totting around a gun.

The Force of Friendly Thoughts

Dodge Brothers business has just reached and passed another milestone in its history.

In less than three years approximately two hundred thousand Dodge Brothers Motor Cars have been placed in the hands of owners.

If this sales-record represented the appeal of a price, the total would not be particularly impressive.

The important thing is that the car is not thought of in terms of price, but in terms of value.

How often you hear the car spoken of—and how seldom the price!

It is the quality of thought that surrounds it which makes this success noteworthy.

Because people think well of these cars, it is still impossible for Dodge Brothers to build enough of them.

Seldom has there been a finer example of the force of friendly thoughts.

It is an inspiration and an encouragement to build well—because the reward is so great and so sure.

With nothing but good will toward them in every home—how could Dodge Brothers do less than they have done?

Nothing has checked or hindered for so much as a single week, the continued bestowal of this recognition and reward.

The eagerness to own the car is greater today than it ever has been.

The reason is not far to seek.

Take first the mere numerical ownership.

Remember that the satisfaction of these two hundred thousand owners is not casual, but deep and profound.

Multiply them by the average family of even three.

Remember that all of these are warm friends.

Then think of that leaven of thought leavening the whole mass.

You will begin to understand, then, why Dodge Brothers have been building new buildings ever since the business began.

You will understand why the works in which the car is built are still steadily spreading and expanding.

You will get an idea of how much men can do when the homes of a country are solidly behind them.

It will pay you to visit us and examine this car

Goodman Accepts Nomination.

E. R. Goodman, who was nominated for county food administrator by the committee suggested by State Administrator Wattlea, notified the committee Friday that he would accept. The nomination was forwarded to Mr. Wattlea and the appointment will follow in a few days.

Upon receiving formal notice of his appointment Mr. Goodman will at once proceed to organize the county by appointing a representative in each precinct.

No More Letters From E. Boys.

Members of Company E at Camp Cody write that orders for a quarantine of the company on account of measles had been issued and that no more letters will be mailed until the quarantine is lifted.

The disease was contracted from the boys who were transferred from Camp Funston to Company E.

Henry Ford's Tractor.

Henry Ford informed friends at the Detroit Athletic club in Detroit the other day that he had just notified France that that country could have 12,000 Ford tractors. He is now working on from 6,000 to 7,000 for England, and all of these will have to be delivered before America's demand is met. Mr. Ford said that he was taking advantage of the present fine weather in making the tests, and that in a short time several of these tractors would be moved to the south for test work there. He laughingly said he was 54 years old, but believed that in his present condition he was capable of running farther and running faster than any 34 year old man in Detroit. As indicating the work he is doing, he told of rising at 6 o'clock Wednesday morning and of following 11 tractors over the fields. He rode many of these, and at the close of the morning's test, knew everything that was to be known regarding the work of each. Mr. Ford said that all of his tractors were being fitted to create their own light for night work. The other night a test was made with one of them, and it plowed an acre in 65 minutes. Mr. Ford said that it was evident that the government action with regard to the manufacturing of automobiles was in line with a saving policy and that it was probable the government did not care to have the manufacturers make too many cars, as too many cars meant the consumption of precious gasoline.

WILL OBSERVE MEATLESS AND WHEATLESS DAYS

C. O. Weingand, a member of the hotel and restaurant committee of the food administration, notified all hotels and restaurant keepers of the city Saturday that beginning today they must observe meatless and wheatless days. If they fail to do this voluntarily they will be placed under license and compelled so to do.

Tuesday is meatless day and Wednesday wheatless day. Meatless day means not serving any beef, mutton, veal, lamb, pork, or any of their by-products which include animal fats of all kinds. In their stead J. F. Letton, state chairman of the committee urges the use of fowl of all kinds and fish, which are as nutritious, palatable and economical as the meats tabooed. This applies to sandwiches and the like.

Wheatless day means the use of rye, graham, corn and other breads other than wheat. Instead of pies and cakes, use rice, farina and puddings of such materials, and ice cream and water ices.

Pledge cards have been given all hotels and restaurants to sign. Those who refuse to sign will be reported to Washington for further action as the government has requested a list of all who do not comply.

K. C. Drive Now in Progress.

A drive to secure funds to carry on the Knights of Columbus war work began yesterday and will continue the country over until December 24. It is hoped, however, to complete the work in Lincoln county this week. The amount allotted to Lincoln county is \$2,000, and it is hoped by the committee to secure this amount. The war work of the Knights of Columbus is similar to that of the Y. M. C. A. and is deserving of the support of the public. While the soliciting will be largely confined to Catholic families, it will probably not be confined to that class exclusively, for in the camps and in the war zone the advantages offered by the buildings and equipment will be for both Catholic and Protestant soldiers, and in no way will there be conflict in the good to be accomplished by both orders. Here's hoping that the necessary \$2,000 in Lincoln county will be contributed.

Miss Jeanette Johnson, who comes from Lincoln to give the demonstration Friday afternoon will be the guest of Mrs. Ralph Smith while in the city.

Cattle Growers Must Own Land.

M. W. McCullough, cattle grower of Maxwell, who was in town Friday, says that the time has come when the stockman must own his grazing land; that the day of leasing land or letting his cattle out to pasture for the summer at so much per head, has passed. Charges for summer pasturing has increased wonderfully as has also the rental of leased land, and besides both these are uncertain. The only solution, therefore, is for the cattlemen to buy the land he needs for pasturage.

The city council will meet in regular session this evening. One of the matters to be considered is the sale of the \$10,000 bridge bonds, the bids to be opened at this meeting.

Will Drive Cars from Factory.

J. V. Romigh, the local Dodge Motor car dealer, left Sunday night for Detroit to drive out cars from the factory to North Platte. The scarcity of automobile cars and the slow movement of freight makes it almost impossible to get motor cars shipped, and having an opportunity to secure eleven cars from the factory, Mr. Romigh concluded his wisest and safest plan was to take men to Detroit and drive the cars to North Platte. The party is expected home about Sunday.
